📁 Projects

Hostel Management System

- Developed a Hostel Leave Management System with a user-friendly interface for students and administrators.
- Streamlined communication by enabling easy submission of leave requests and complaints.
- Included real-time announcements, dynamic form creation, and secure login.
- Enhanced skills in Java programming, GUI design, event handling, and file I/O.

Charite - Help The Poor

- Developed a website with a heartfelt mission: Charity Donation exclusively for children in need.
- Utilized my expertise in HTML, CSS, and JavaScript to craft the website from the ground up.
- Developed a secure donation processing system, including JavaScript validation for data accuracy and security.
- Ensured the website functioned seamlessly across different web browsers for a smooth user experience.
- This project was an independent initiative, showcasing my self-reliance and ability to manage all facets of Front-end development, from conception to deployment.

My Portfolio

- Developed a Personal Portfolio Website allowing me to present my work and showcase my skills.
- The "About Me" section is designed to give visitors a glimpse into my personality and the values I bring to my work as a web developer.
- The "Projects" section showcases my projects where each project is meticulously organized with descriptions.
- I took a user-centric approach to design, ensuring a visually pleasing and responsive interface.
- My portfolio website is a testament to my commitment to web development and my ability to design engaging digital experiences. It encapsulates my journey and invites others to connect with me in the field.
